

ANGLE PIECES TYPE HA-LSA 4 W a/n

Brief Description

Angle pieces of type HA-LSA 4 W a/n are used when space is tight to make it easier to lead in cables and wires (when using a quick-connector of type HA-LSA 4) or coupling links (when using a quick-connector of type HA-LSA 4 Z). In the standard a/n form, the coupling links have a Pg 29 thread to screw into the corresponding holes in a housing of type "increased safety". A smooth offset hole at the lead-in side accepts the nipple of the HA-LSA 4 .. quick-connector.

The cable holder has a fork-type device and fastening screw to prevent the cable from being pulled or twisted.

Types of protection

Type of protection: (Sch) e
Level of protection: IP 54

Certification

BVS Supplement No. 2 for confirmation No. 11 / 78
