

New: FLAMEPROOF HIGH VOLTAGE GATE END BOX TYPE HA-dk10A/4VAC/LS

The development of high-duty mining systems is the reason why the high-voltage drives of the getting and haulage machines are going to be more and more applied. For supplying of these machines the company Hamacher GmbH designed and manufactured a modern gate end box, which can be also used in its special version as middle voltage switchgear. The gate end box has at present the approval certificates of the polish mining authorities
